

ArTainium UV^{plus}

Sublimation Inks for the EPSON® D88

Easy Flow Bulk Ink System

The Easy Flow bulk ink system for the Epson D88 allows users to purchase bulk inks and refill their printer with inks on the fly, therefore providing drastically improved print costs.

The Easy Flow system is simple to fit and installs in under 5 minutes, and provides a seamless way to continuous printing. The system has auto resetting chips that when they reach 95% re-set themselves to full, allowing you to continue printing. The Easy Flow comes pre filled with ArTainium UV+ Sublimation inks. A simple plug and play system, when you run low on a particular colour, you just refill the system by pouring ink into the relevant chamber.

The Easy Flow D88 Comprises of:

- 4 x 100ml CMYK Artainium UV+ Sublimation Ink
- Custom Made Ink Unit
- Colour Match Line Connectors For Plug & Play Installation
- High Use Foam Cartridges for Extended Life
- Comprehensive Installation Instructions
- Warranty & Support

For more information on the Easy Flow Bulk Ink System or to arrange a demonstration please contact us at:

I-Sub Limited, I-Sub House, Gilmorton Road,
Lutterworth, Leicestershire, LE17 4DZ.
